

Model 474-2 ConstaLoader™ Deadweight Test Stand with Controlled Descent for Pencil Style ASTM Type C, D, & DO Durometers shown above (durometer not included with stand)

- **Automatically Descends at the ASTM Prescribed Rate & Force**
- **Maximizes Repeatability**
- **Insures Accurate Readings**
- **Simplifies Hardness Testing**
- **Eliminates User Error**
- **Deadweight for ASTM Types C, D, & DO**
- **Models to Fit All Durometer Styles**

Precision engineered durometer stand has twin pneumatic dashpots to give a smooth, controlled descent. When properly used, this stand and your durometer will make the most accurate hardness readings.

The table can be adjusted and set in place to test materials with nonparallel top and bottom surfaces.

A mass applies the force to consistently counter the durometer mainspring each and every test.

The stand will accept sample materials up to 3" thick. Custom stands are available for larger samples.

For \varnothing 2000™ style durometers order the Model 474-1; for Pencil style durometers order the Model 474-2; and for Classic or Ergo style durometers order the Model 474.
