

Cooking Thermo-Timer

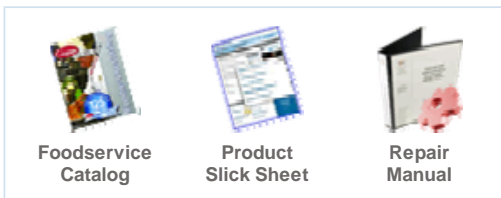

Model #: DTT361

The DTT361 Cooking Thermo-Timer monitors internal temperatures of food cooking in your oven. Heat resistant, stainless steel probe that inserts into the food while the oven door closes tightly over its specially designed silicone-jacketed probe cord. The cord will not fray or allow moisture to penetrate inside. Once the desired temperature and / or time setting is reached, an alarm sounds.

Product Specifications

Certifications	CE, Rohs, Weee
Warranty	1 Year Warranty on unit & probe
Mounting	Wall mount bracket with magnet
Probe	Replacement Probe 9335A Available
Features	F/C switchable
Temperature Range	32° to 392°F / 0° to 200°C
Temperature Accuracy	±4°F / ±2°C
Resolution	1°F / °C
LCD Height	1.9" x 1.4" (48.2 x 35.5 mm)
Housing Material	ABS Plastic
Sensor Type	Thermistor
Shaft Length	6.5" (16.5cm), 90° bend
Shaft Diameter	0.156" (4mm)
Cable Length	44" (1.1m)
Cable Material	Silicone-Jacketed Thermistor Cable
Battery Type	(1) 1.5V AAA battery
